Once on the Internet banking page, customers must check the address bar and make sure that it matches the one in the address bar. The presence of the padlock and the letters https indicate that the site has a certificate of security that guarantees its authenticity.

## Internet Banking (Personal accounts)

To access Internet banking services, it is necessary to follow the Banca UBAE authentication and authorization procedure. You must insert both your user ID and password given to you by the Bank when you signed your contract.

We emphasize that you must change your password after your first login and, for ensuring greater security, we recommend that you change it periodically.

In order to enhance security, Banca UBAE has adopted additional procedures for guaranteeing more secure transactions that conform to applicable regulations regarding payments. In particular, in order to make a transaction, once you have entered the system, insert your PIN, a 10 (ten) digit number created by you at the time of the first login to the service.

The pin will be requested every time you login, but the position of the fields to be completed will depend on the transaction.

The numbers to be inserted in the box on the screen (blank fields) must take into account the sequence of the PIN chosen by you.

Inserire le sole cifre nelle posizioni indicate, del codice PIN che ti sei censito.

## Corporate Banking (Core Banking)

Banca UBAE's website security aspects are the same as those for the personal accounts (Internet banking). Please see the "Browsing Safely" for details.

The login page for corporate customers is different however. The following information is required:

Codice Postazione

Alias

Password di accesso

[Accedi](#)

[Guida all'accesso:](#)  
Per accedere al servizio bisogna inserire il codice Postazione dell'azienda, il codice Alias e la Password. L'amministratore (master) non deve inserire il codice Alias.

[Informazioni:](#)  
Informazioni per i clienti prima dell'accesso.

[Sicurezza](#) [Browser](#) [Help Desk](#)

where

**Workstation code** matches the User name

**Alias** is any person authorized to carry out transactions

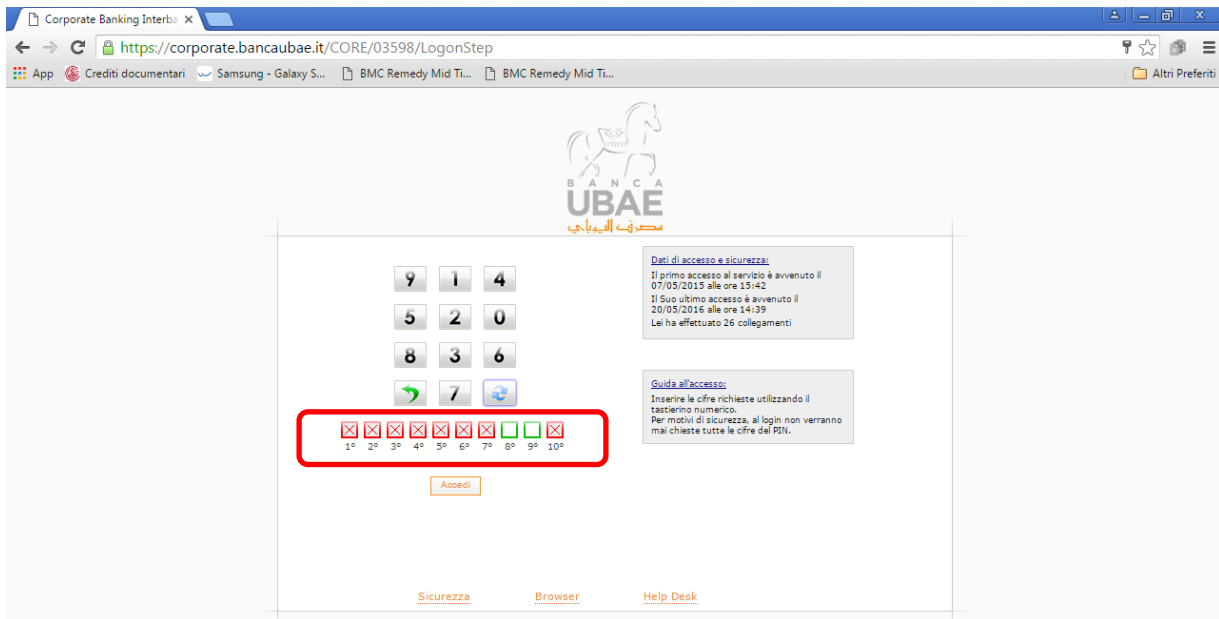

**Password** is the password (for each user)

It is also necessary to insert your PIN to carry out transactions in the corporate banking section.

Specifically, once you have logged into the system, you must insert the number created by you at the time of the first login to the service consisting in a 10 (ten) digit number that is called the PIN.

This number will be requested each time you log in but the position of the fields to be completed will be different each time. Choose the numbers to be inserted in the box on the screen (blank fields). You must take into account the sequence of the PIN chosen by you.

Below is the box and the position of the numbers that must be inserted is in green, taking them from your Pin (in this example, only the numbers in the 8th and 9th position will be extracted).

After having inserted your PIN, you can access the functions offered by the service

- Current-account menu
- Payment menu
- Notification menu
- Management menu
- Service menu
- OTP request

In order to carry out any transactions in the system, the customer must confirm the transaction by inserting the security code generated by the OTP ( One Time Password) system provided by the Bank.
